HumanWare provides assistive and adaptive technology items for blind, low-vision, Deaf-Blind, and learning-disabled individuals. The product range includes integrated speech and Braille technology, a range of video magnifier solutions, scanners, magnification software, Braille displays and writers, Braille translators, screen reading software, and speech synthesizers. These products are purchased and used by individuals, home users, governments and private agencies, libraries, eye-care professionals, schools, and rehabilitation organizations.

Trekker Breeze is an all-in-one handheld talking GPS for people who are blind or have low vision. The GPS verbally announces names of streets, intersections, and landmarks as you walk by and knows what is around in your location (public services and businesses).

HumanWare has achieved worldwide recognition for the use of innovative technology in the design and manufacture of products for the visually impaired.
