MedStar Transport is accredited by the Commission on Accreditation of Medical Transport Systems and consists of four helicopters with bases strategically located throughout the Mid-Atlantic region to transport any critical care cardiac patients, as well as heart and hand trauma patients.

The standard flight crew consists of a pilot, a critical care nurse, and a critical care paramedic, all of whom are trained to handle the full spectrum of adult and pediatric critical care patients.

MedStar Health partners with LifeStar Response whose ambulance and medical transportation services include basic and advanced life support and specialty care transports into or out of any MedStar Health facility.

The ambulance units are staffed by state-certified emergency medical technicians, nationally registered or state-certified paramedics, and registered nurses. A wheelchair-van service is available for clients who require assisted transportation but not an ambulance.
