English

Volunteers at Habitat for Humanity, Culpeper, provide most of the construction labor. However, each recipient of housing also contributes sweat equity hours in both their houses and in other projects. Volunteers are needed on some of our committees (Fundraising and Public Relations & Site Selection and Building) and at

the construction site when we are building and house.

The organization needs volunteers with management and business skills to fill our officer and board positions. In other words, whatever your skill level or ability, there is something you can do.
